EDUCATION

Columbia University

Master of Science in Business Analytics

New York, NY

Expected Dec 2026

Joint Program: Columbia Engineering & Columbia Business School

- Product Management (CBS): AI-driven PRD generation (Chat GPT) rapid prototyping (Lovable), system design (Miro)
- Relevant Courses: Business Analytics I, Data Analytics, Marketing Analytics, Product Management, Capital Market
- Coursework: Business Analytics I, Data Analytics, Marketing Analytics, Digital Marketing

Emory University

Bachelor of Science in Applied Math & Statistics and Economics

Atlanta, GA

May 2025

GPA 3.76/4.0

Mathematical & Programming Foundation:

- Advanced Mathematics: Partial Differential Equations, Numerical Analysis
- Machine Learning & Programming: ML 1 – algorithmic implementation using Python and R
- Quantitative Economics: Quantitative Finance, economic modeling
- Focus: Mathematical theory and computational methods underlying data science

Technical Skills:

- Programming: Python (NumPy, Pandas, Scikit-learn, Matplotlib), R (statistical modeling), SQL, Excel (advanced)
- AI & Product Tools: ChatGPT (prompt engineering), Claude, Lovable (prototyping), Miro (system design)
- Analytics: Tableau, statistical modeling, econometric analysis, machine learning

WORK EXPERIENCE

Yinhua Fund Management

Beijing, CN

Quantitative Analyst Intern

Jun 2025 - Aug 2025

- Conducted asset allocation research analyzing 10 years of Chinese equity and ETF data across multiple benchmarks; proved diversified asset group portfolios delivered superior risk-adjusted returns (higher information ratio and Calmar ratio, lower volatility) compared to single-index strategies
- Created executive-ready visualizations and strategic reports translating complex quantitative findings into actionable insights for senior management decision-making
- Optimized Python-based risk parity model, reducing computational errors by 22% and improving data consistency across 1,000+ asset database
- Provided quarterly investment recommendations to senior advisors based on quantitative performance analysis, government policy trends and macroeconomic indicators; identified optimal benchmark allocations and high-conviction sectors for tactical positioning

Invest Atlanta and Emory University Center for AI

Atlanta, GA

DataThink Project Manager

Jan 2024 - May 2024

- Built regression models using SQL and Python analyzing 10,000+ neighborhood mobility scores across 10+ economic, educational, and community predictors; identified Economic Stability index (employment access, living wages, small business survival) as strongest displacement predictor ($\beta = -14.83$, $p < 0.001$)
- Led housing displacement research analyzing 2018-2022 Atlanta migration data; optimized data pipeline processing 500+ records with 18% efficiency improvement, redirecting analytical capacity toward understanding displacement patterns across seniors, homeowners, and renters
- Presented findings to Invest Atlanta senior leadership, translating statistical analysis into workforce development strategy; demonstrated displacement risk was demographic-specific, enabling targeted resource allocation to vulnerable communities with limited economic opportunity
- Recommended data-driven investment framework integrating mobility indicators and tax parcel analysis; enabled strategic funding prioritization toward neighborhoods where economic development interventions would maximize displacement prevention impact

TooBit

Remote

Marketing Analyst Intern

Dec 2022 – Feb 2023

- Conducted competitive analysis of 10+ crypto exchange community programs; delivered strategic recommendations to product and marketing teams that enhanced customer experience and informed platform differentiation strategy

- Designed and launched user acquisition campaign featuring \$50 - \$1,000 variable prize structure; achieved significant increase in user engagement and platform activation through data-driven reward optimization and behavioral incentive design
- Developed adaptive engagement reward system using SQL and Excel analysis combined with machine learning principles; leveraged AI-assisted code development to optimize volunteer rewards and contribute to safer online community environment
- Partnered with engineering team to launch Southeast Asia Telegram community; executed A/B testing on messaging variants and onboarding flows to maximize activation rates through iterative data-driven optimization

ACADEMIC PROJECTS & EXPERIENCE

MIAC (Mortgage Servicing Rights Capstone Project)

New York, NY

Business Analyst

Jan 2026 – Apr 2026

- Built interactive Power BI visualizations translating complex financial data into executive-ready insights; enabled non-technical stakeholders to rapidly assess transaction activity, portfolio performance, and risk exposure through intuitive dashboards
- Designed centralized Power BI trade blotter dashboard consolidating MSR transaction records, holdings, and hedge positions from multiple sources; reduced analyst time spent on data retrieval by 30-40%, enabling focus on strategic analysis over manual data compilation

YesStyle Product Improvement (Product Management Project)

New York, NY

Product Analyst

Jan 2026 – Apr 2026

- Conducted customer research surveying 100+ K-beauty consumers; identified three critical unmet needs: virtual try-on (93% demand), personalized discovery to reduce choice overload (100% reported overwhelm), and streamlined reordering (93% repeat purchasers)
- Led end-to-end product development: created PRDs, prioritized features via impact-effort analysis, built agile roadmap, designed data flow architecture (Miro), and developed functional prototype (Lovable) addressing key customer pain points

911Cyber Digital Marketing Campaign (Digital Marketing Project)

New York, NY

Digital Marketing Analyst

Jan 2026 - Mar 2026

- Analyzed campaign performance using CTR and CPC metrics; delivered optimization recommendations improving customer journey and conversion for cybersecurity awareness initiative
- Executed multi-channel campaign leveraging keyword research, audience targeting, and A/B testing to optimize engagement and messaging effectiveness

LEADERSHIP – CHAMPIONSHIP ACHIEVEMENT

Emory University Women's Varsity Golf Team

Co-Team Captain | 2025 NCAA DIII National Champion

Aug 2021 - May 2025

- Created training and integration program for new teammates accelerating skill development and cultural alignment with championship standards
- Led team to 2025 NCAA Division III National Championship as co-captain, culminating four-year varsity career with program's premier athletic achievement
- Mentored underclassmen on mental performance and competitive resilience, developing frameworks to manage pressure that contributed to championship-level execution
- Two-time NCAA DIII National Champion (2022 player, 2025 co-captain); selected for Emory's 100 Senior Honorary recognizing top 100 seniors for campus leadership

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn) | R | SQL
Data Visualization: Power BI | Tableau | Matplotlib | Seaborn | Excel
AI/ML Tools: ChatGPT | Claude | Lovable | Prompt Engineering
Product/PM: PRD Development | Agile | Miro | User Research | A/B Testing
Analytics: Regression | Statistical Modeling | Predictive Analytics
Finance: Portfolio Optimization | Risk Modeling | Quantitative Analysis

HONORS & CERTIFICATIONS

- 2025 NCAA Division III Women's Golf National Champion (Co-Team Captain)
- 2022 NCAA Division III Women's Golf National Champion
- Emory University 100 Senior Honorary (Top 100 seniors for leadership & impact)
- Google Analytics Professional Certificate
- Four-Year Varsity Letter Winner
